

Watch Alert #5

July 12, 2009

Good Evening Neighbors,

We have had another theft of solar light sets. The thefts occurred starting on the evening of July 6th. There were a total 3 sets of solar lights taken from three different locations. The first was at 1212 Cypress Bend Circle on the evening of Monday, July 6th. The other sets were taken on the evening of Thursday, July 9th from 4745 Silver Heron Drive and 4751 Silver Heron Drive. This makes a total of 4 sets that have been taken from our neighborhood. Although these lights are easy to install and beautify your yard, it makes it easy for someone to walk away with them. I know of no way to secure them to prevent theft. This and other items to beautify our yards are potential targets. I have no suggestions at this time. **Let's get the word out and STAY ALERT!!!**
